Company	Designation	# of Years
Infoblox	Senior Web Developer	4 years 7 months (Currently working)
NTT Ltd.	Software Developer	10 months
Workflexi	Software Developer	2 years 3 months
Software Sales & Development, Kolkata	Software Developer	10 months
Codezin Technology Solutions Pvt Ltd	Software Engineer	1 year

PROJECTS WORKED ON

Project: Infoblox Corporate Websites (infoblox.com, blogs.infoblox.com, inclusion.infoblox.com)

Role: Senior Web Developer - Development, Maintenance & Feature Ownership

Technology Stack: PHP, WordPress, HTML, CSS, JavaScript, jQuery, MySQL, Marketo, PathFactory, GTM, GA4, TrustArc, Vidyard etc

Websites:

- <https://www.infoblox.com/> (Including 4 localized versions)
- <https://blogs.infoblox.com/>
- <https://inclusion.infoblox.com/>

Description:

Infoblox is a global leader in secure cloud-managed networking and DNS-based cybersecurity solutions. As the Senior Web Developer, I am responsible for end-to-end development, new feature implementation, performance optimization, localization, and ongoing maintenance across the company's flagship websites.

I have built and enhanced multiple properties - including blogs.infoblox.com and inclusion.infoblox.com, handling everything from custom WordPress template development and complex GTM/GSC/TrustArc integrations to Marketo form automation, template development, PathFactory integrations, campaign landing pages, schema implementation, SEO improvements, and security updates.

Project: Workflexi.in

Role: Development & Maintenance

Technology Stack: HTML, CSS, JavaScript, jQuery, Angular 8, Java Spring, MongoDB

Website: <https://www.workflexi.in/>

Description: Workflexi is a freelance job portal designed to connect businesses with skilled independent professionals. I contributed to both frontend UI implementation and backend functionality development. My responsibilities included integrating SMS and payment gateways, implementing JSON schema-based dynamic forms, managing user workflows, and supporting overall platform enhancements. The project team consisted of six members.

Project: Centre Zenith

Role: Web Developer - Development & Maintenance

Technology Stack: HTML, CSS, jQuery, PHP, Laravel, MySQL

Website: <https://www.centrezenith.com/>

Description:

Centre Zenith is an French language school. I contributed to both frontend and backend development, implemented dynamic content modules, optimized user workflows, and maintained the overall platform experience to ensure smooth performance and usability.

Project: ALPA India (Airline Pilots Association of India Portal)

Role: Web Developer - Development & Maintenance

Technology Stack: HTML, CSS, JavaScript, jQuery, PHP, Laravel, MySQL

Website: <https://www.alpaindia.org/>

Description: ALPA India is the official organization representing airline pilots across India. As part of a two-member development team, I contributed to both frontend UI implementation and backend feature development. Key responsibilities included creating multi-level user management, building admin portals, implementing news & events modules, developing discussion forums, and enabling offline payment workflows. I ensured smooth platform functionality, security, and usability for pilots and administrators.

Project: Indians in France

Role: Web Developer – Development & Maintenance

Technology Stack: HTML, CSS, jQuery, PHP, Laravel, MySQL

Website: <https://www.indiansinfrance.com/>

Description: Indians in France is a community-driven social platform designed to help Indians living in France stay connected through news, updates, and cultural discussions. I implemented key interactive features including a real-time chat system and a Facebook-like commenting interface, along with managing ongoing development, optimization, and maintenance of the platform.
